

STUDENT ENGAGEMENT SURVEY

INTRODUCTION

In 2016, a new statewide school accountability system was developed based on input from educators, policymakers and Idahoans from throughout the state. The purpose of the school accountability system is to examine progress being made in our public schools toward meeting interim and long-term goals set by the state and ensure compliance with the federal Every Student Succeeds Act. To achieve this, the accountability system uses a variety of indicators such as student academic achievement, graduation rates, college and career readiness, and many more. A key element of the accountability system and its examination of school quality is a survey of teacher, parents and students to assess their engagement with their school. The attached student engagement survey is one of those surveys.

ABOUT THE SURVEY

The following survey questions were developed by Panorama Education as part of their Student Survey, dated September 2015. The Panorama Student Survey, originally launched in Fall 2014, was designed to address issues identified as part of the Measures of Effective Teaching (MET) Project. Drafted via a collaboration between Panorama Education and the Harvard Graduate School of Education, the Panorama Student Survey is a set of survey scales, or groups of questions, that measure student perceptions of teaching and learning, as well as perceptions of school climate and their own strengths and weaknesses. Each scale has a substantial and growing body of evidence of its validity across specific contexts and uses. Because the survey has been designed as a series of scales each related to a single topic, the survey can be customized by selecting individual topic areas without compromising its validity. Additional information regarding the methodology used in developing the survey questions and its use may be found at www.panormaed.com.
